

LAW ENFORCEMENT
TACTICAL TRINITY®

THE SYSTEM TO COMBAT DARKNESS

SUREFIRE

WE BUILD THE BEST... BECAUSE WE BUILD FOR THE BEST.

You're a cop. You're different. You run toward the sound of gunfire—into harm's way—for the sake of others. Much of your work goes on in the darkness, so light is your ally and SureFire is your partner—bringing you the finest illumination tools in the world.

SureFire has worked closely with law enforcement ever since supplying L.A.P.D. SWAT with weapon-mounted lasers for the '84 Los Angeles Olympics. And SureFire continues to seek the help of the best, most experienced officers to design and build the finest illumination tools for cops.

SureFire's innovative mindset and its commitment to advanced technology and using only the finest materials has led to the creation of illumination tools that are unmatched in light output, beam quality, and overall durability. SureFire lights give you the advantage you need. It's no coincidence that they're used by more SWAT teams than any other brand.

WHAT MAKES SUREFIRE DIFFERENT

- Power-regulated LEDs provide high light-output levels and long runtimes; no filaments to burn out or break
- Lightweight, rugged bodies are virtually indestructible
- Coated Borofloat[®] windows protect the LED and maximize light transmission
- Micro-textured reflectors and TIR lenses create flawless beams
- Tailcap switches are simple to operate in high-stress situations
- O-rings and gaskets seal out moisture, dust, and dirt
- 123A lithium batteries provide unmatched power in all weather conditions as well as offer built-in fault protection and a 10-year shelf-life

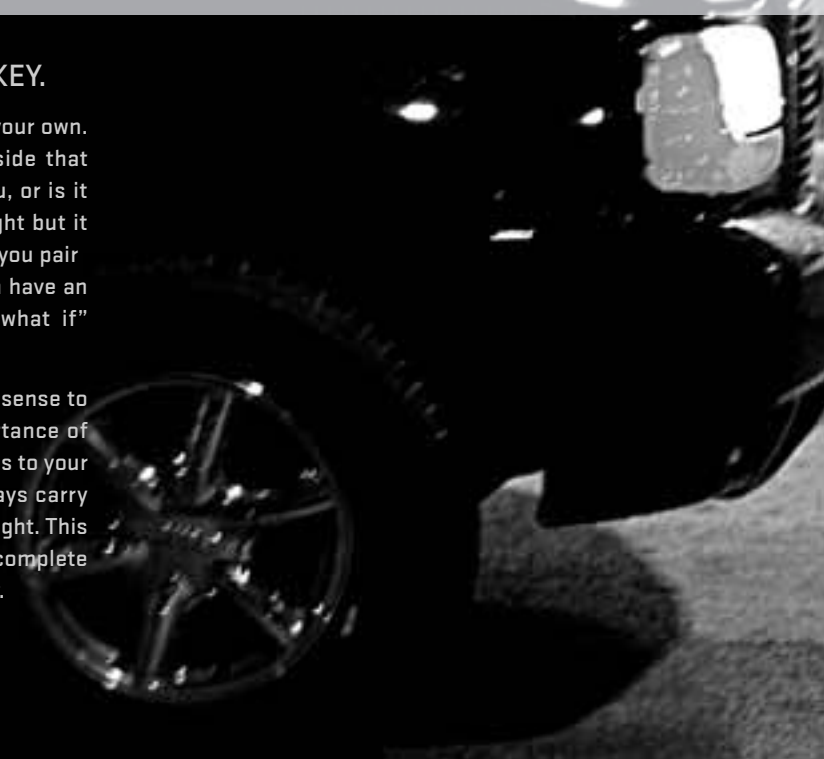

WHEN YOU LEAVE YOUR VEHICLE... WHAT YOU GOT IS WHAT YOU GOT.

ONE IS NONE, TWO IS ONE—BUT THREE IS KEY.

Anytime you're out of your vehicle, gear-wise, you're on your own. It may be high noon, but it's darker than midnight inside that warehouse you're about to enter. Got your light with you, or is it charging back in your cruiser? What if you have your light but it goes out? Got a backup or an extra set of batteries? Can you pair your light effectively with your pistol? Does your weapon have an integrated light you can count on? We pose these "what if" questions to ourselves every day.

As you know, unpredictable things happen, and it makes sense to be ready for whatever comes your way. Given the importance of light in identifying and isolating threats, and how it relates to your overall effectiveness in the field, the solution is to always carry three lights: a primary, a backup, and a weapon-mounted light. This is the core of the SureFire's Tactical Trinity®—the most complete illumination system ever developed to ensure your safety.

“A BRIGHT, TACTICALLY CORRECT LIGHT IS CRUCIAL IN LOW-LIGHT ENVIRONMENTS, PLUS IT OFFERS A HUGE, POTENTIALLY LIFE-SAVING TACTICAL ADVANTAGE: BLINDING AND DISORIENTING AN OPPONENT.” —Paul Michel, The FBI Law Enforcement Bulletin

800.828.8809 → www.surefire.com

THE RIGHT LIGHT IS CRITICAL

Do you carry a flashlight or an illumination tool? Do your lights produce a smooth, flawless beam, or are they littered with dark spots and rings? Are your lights small enough to carry with you at all times yet powerful enough to temporarily disorient the night-adapted vision of an opponent? Are they reliable? Do they fit with your department's requirements? These are the questions we ask ourselves. From routine administrative tasks to high-risk situations, your lights are essential tools—perhaps as important as your pistol. Do you carry the finest lights? Do you carry a SureFire illumination tool?

CONTROL THE DARKNESS

Using the finest illumination tools is vital to your continued success, but it's important to master your lights as well. Using proper low-light tactics (like those taught at SureFire Institute®*) allows you to move through the darkness with minimal detection and control your adversary's ability to see you—or anything else for that matter. The brilliant beam of a SureFire light not only illuminates the dark but is also a valuable force option, causing confusion and often reducing the aggressiveness of a subject. Blinding light gives you a tactical advantage by identifying your opponent while denying him the ability to see.

And when the use of deadly force is necessary, departmental policies require positive threat identification as well as threat isolation. Tactical-level light is absolutely crucial in these situations when you must positively identify potential threats and place accurate shots in low-light situations. Which lights do you want to count on when decisions are made in split seconds?

*SureFire Institute is a registered service mark of SureFire®, LLC. C&W Murphy and Associates licenses the SureFire Institute name and exclusively uses SureFire products but is not a subsidiary of, or affiliated with, SureFire, LLC in any manner.

ETHING TO THINK ABOUT

“ IN 70% OF SHOOTINGS, OFFICERS WERE OPERATING IN (LOW) LIGHT CONDITIONS THAT EQUATE WITH THEM BEING CLOSE TO LEGALLY BLIND. ”

– Dr. Bill Lewinsky, Force Science Research Center at Minnesota State University

“ OVER 70% OF ALL OFFICER-INVOLVED SHOOTINGS TAKE PLACE IN A LOW-LIGHT ENVIRONMENT, YET MOST TRAINING TAKES PLACE UNDER NORMAL LIGHTING CONDITIONS. EVEN DAY-SHIFT OFFICERS REGULARLY OPERATE IN LOW-LIGHT CONDITIONS WHEN SEARCHING UNLIT STRUCTURES, BASEMENTS, CLOSETS AND TUNNELS. ”

– Bill Murphy, Police Officer and Lead Instructor at SureFire Institute

➤ You need intense, tactical-level light to do your job—we all know the stakes couldn't be higher. At SureFire we believe that having three virtually indestructible and reliable illumination tools is vital to your safety. That's what we've learned from law enforcement over the past three decades. And that's why we developed the SureFire Tactical Trinity for Law Enforcement. We know it will help you succeed in the field.

WATCH THE TACTICAL TRINITY VIDEO AT WWW.SUREFIRE.COM/T3/VIDEO

1

PRIMARY LIGHT

One is none. You need to start with one powerful light that's small enough to always carry with you, and easy to access no matter what you're doing. You should have your light holstered, just like your handgun, with extra batteries right there in the holster—available when you need them. It should provide tactical-level light (over 50 lumens for an LED) to enable you to disorient or temporarily blind the night-adapted vision of an aggressor. But one is not enough.

2

BACKUP LIGHT

Two is one. What do you do if your primary light is lost or fails? You need a backup light. It must be compact, since room on your duty belt, or under your suit jacket, is limited. But it has to be bright enough to blind or disorient, or what good is it? It should also use the same batteries as your primary light to keep things simple. A backup light must be a long-running, tactical-level light that's as bright and tough as your primary light, but small and easy to carry so it's always around. And it should be perfect for off-duty use, because you're always a cop, and failure is not an option.

3

WEAPONLIGHT

Three is key. You need a weapon-mounted light because, when your weapon is deployed, we all know what's on the line. You need a powerful, lightweight, and shockproof WeaponLight that mounts easily to your pistol, shotgun, or rifle and is always ready to go. Lights with lasers are available too, but on that front, you make the call. Handheld lights are indispensable, but as any gunfighter will tell you, sometimes it's best to keep both hands on your gun.

1 PRIMARY LIGHT & HOLSTER

- A powerful tactical-level light* that's long-running, virtually indestructible, and sits in a tactical holster so it's readily available. Must be suitable for pairing with a pistol.

RECOMMENDED:

G3® LED Kit | Z2 LED Kit | AZ2 CombatLight® p.6-7

LAW ENFORCEMENT TACTICAL TRINITY®

2 BACKUP LIGHT

- A powerful tactical-level light* that is more compact than your primary light; it can be placed in a pocket or on a duty belt and accessed quickly when needed. A two-stage light can provide officers with general-use light with extended runtime.

RECOMMENDED:

E1B Backup® p.8

3 WEAPONLIGHT

- Weapon-mounted tactical-level lights* are available for pistols and long guns. When weapons are deployed, in low-light situations, there's nothing more important than efficiently identifying and engaging threats.

RECOMMENDED:

X300® or X400® p.9

* A tactical-level LED light should emit at least 50 lumens; that's typically enough light to temporarily disorient or blind the night-adapted vision of an opponent.

PRIMARY LIGHT

SF 123A LITHIUM
BATTERIES

V85 HOLSTER

G3® LED

G3® LED HOLSTER KIT

In high-stress situations, where split seconds count, getting your light quickly paired with your pistol can mean the difference between life and death. We understand this. That's why the G3 LED Holster Kit was designed to fit with law enforcement training, to allow you to deploy your primary light quickly and safely—both with or without a handgun. The G3 LED flashlight provides tactical-level light for 5.8 hours, with useful light for 9.4 hours. An aluminum bezel fits perfectly into the holster, while the lightweight Nitrolon® body has a molded-in grid pattern that helps you maintain a firm grip in all weather conditions. The patented, tactically correct tailcap switch is designed to be easy to use; press for momentary-on and twist for constant-on.

This holster and light combination was designed to be positioned near your midsection, where you're trained to place your off hand when drawing your pistol. (See handgun/flashlight techniques below.) The included V85 holster is ambidextrous, lightweight yet rugged, and securely fastens to your duty belt. It holds the G3 LED in a tactically correct bezel-down manner so it's always ready to be deployed in one motion. (Holster accommodates other 1.25" bezel SureFire lights.) It also features a battery compartment that holds three 123A lithium batteries to provide you with more than 18 hours of light in the field—far greater runtime than a typical rechargeable flashlight. And the V85 holster can be angled to match your drawing style and maximize your speed on the draw.

The V85 holster is also sold separately. It accepts most SureFire lights with aluminum bezels that are 1.25" in diameter.

HANDGUN / LIGHT TECHNIQUES

➤ USING TACTICAL-LEVEL LIGHT WITH PROPER TACTICS AND MOVEMENT IS VITAL TO YOUR SUCCESS. A LIGHT DEPLOYED WITHOUT MOVEMENT OR MOMENTARY LIGHT BURSTS CAN GIVE YOUR ADVERSARY AN UNDUE ADVANTAGE. TRAINING IS CRUCIAL AND SHOULD BE SOUGHT AT INSTITUTIONS LIKE THE SUREFIRE INSTITUTE, LOCATED IN SOUTHERN CALIFORNIA. LISTED BELOW ARE THE FOUR MOST COMMON METHODS FOR PAIRING A PISTOL WITH A LIGHT. THEY ALL HAVE THEIR STRENGTHS, AND YOU SHOULD TRAIN TO TRANSITION BETWEEN THEM AS CIRCUMSTANCES DICTATE. THESE PHOTOS ARE FOR ILLUSTRATIVE PURPOSES ONLY—ALWAYS SEEK PROFESSIONAL TRAINING.

THE ULTIMATE PRIMARY LIGHT & HOLSTER COMBINATION

NEW

AZ2 COMBATLIGHT® DUAL-OUTPUT LED FLASHLIGHT

The all-new AZ2 LED CombatLight® is the ultimate handheld illumination tool for law enforcement—providing fifty percent more lumen output on high, compared to the powerful G3 LED. It provides two tactically oriented beam patterns to meet the needs of any operation. Press the tailcap switch and four secondary LEDs generate a 25-lumen white flood beam ideal for virtually any close- to mid-range application, with enough peripheral light to maximize situational awareness. Press further on the switch and the primary and secondary LEDs come together to pump out a far-reaching 120-lumen beam of searing tactical-level white light. (Twist the tailcap switch for constant-on at either level.) The LEDs are highly efficient, which translates into long runtimes, especially on the low setting. They are durable, having no filaments to burn out or break, and the LEDs are reliable and will never need replacing. The AZ2 fits bezel-down in SureFire's innovative V85A holster so it's always at the ready—making it the ultimate primary light for law enforcement.

V85A HOLSTER

The V85A holster is sold separately. It was specially designed to hold most two-cell SureFire lights with 1.25" aluminum bezels such as the 6P® LED, 6P® LED Defender®, G2® LED, G2Z LED, Z2 LED, and the AZ2 CombatLight® pictured above.

order at: www.surefire.com/v85aholster

Z2 LED HOLSTER KIT

The virtually indestructible Z2 LED, the light at the core of this rugged holster kit, features a high-strength aerospace aluminum body with CombatGrip™, and fits securely in SureFire's ergonomic V85A holster. This combination makes it easy to pair the light with a pistol. Its high-performance LED produces a flawless 80-lumen beam of tactical-level light for up to three hours. And the Z2 LED is equipped with a tactical tailcap switch and a lanyard that makes changing mags easier while holding your light.

order at: www.surefire.com/z2holsterkit

Holds three extra batteries; two to keep your Z2 LED running strong, and one for your Backup®.

2

BACKUP LIGHT

BACKUP®

DUAL-OUTPUT EXTENDED-RUNTIME LED FLASHLIGHT

The compact yet powerful E1B Backup® was designed as an ideal backup light for undercover officers and beat cops alike—it's four times brighter than a typical two-D-cell flashlight. With a length of only four inches and a weight of under 3 ounces, the Backup doesn't take up much space, and its dual-output LED delivers two useful light levels. It leads with 80 lumens of blinding white light for high-stress tactical situations and follows with 5 lumens of useful light at its low setting—still plenty of light to check an ID or write a citation. The super-efficient Backup delivers useful light levels for 37 hours on a single 123A battery. Its high-strength aerospace aluminum body is hard anodized for extreme durability yet features smooth styling, which goes easy on clothing. Its sturdy two-way pocket clip allows for bezel-up or bezel-down carry to accommodate personal preference. And its tailcap switch can be pressed for momentary-on or clicked for constant-on at either level. It's a must-have for any law enforcement officer.

order at: www.surefire.com/backup

3

WEAPONLIGHT

X300[®] LED WEAPONLIGHT

The SureFire X300 WeaponLight features 110 lumens of searing light output that reaches deep into the darkness to identify a threat or temporarily blind the night-adapted vision of an aggressor. Its TIR lens produces a tight central beam with plenty of surround light to accommodate peripheral vision to help avoid unexpected surprises in close quarters. The X300's virtually indestructible LED is packed in a waterproof high-strength aerospace aluminum body that's been hard-anodized for extreme durability. And a tempered Borofloat[®] window protects the LED and TIR lens, while maximizing light output. O-rings seal out dust, dirt, and moisture.

The X300 also features integrated switching that makes the light easy to operate with either hand. Remote switching options are available to provide precise control with virtually any weapon. The X300 mounts to both Universal and Picatinny rails, with many other SureFire adapter mounts available. It's an ideal weapon-mounted light for your pistol or long gun.

order at: www.surefire.com/x-series

DG SWITCH

Ambidextrous pressure-activated grip switch for use on pistols

XT SWITCH

Remote switch attaches to Picatinny rail for use on long guns

MOUNTING RAILS

If your pistol lacks a rail, there's a mounting rail right for you

NEW

X400[®] LED WEAPONLIGHT + LASER

The SureFire X400 is a rugged LED WeaponLight with all the features of the X300 with one important addition: a powerful red-laser sight that holds zero for hundreds of fired rounds. Its versatile, brilliant beam and bright laser (which is nearly twice as bright as the competition) make it a perfect choice for officers who want a reliable laser sight for close- and longer-range applications that can thrive in the field.

WEAPONLIGHTS AVAILABLE AT SAFARILAND.COM

↘ ADVANCED LIGHTING & TACTICAL SYSTEMS

The SureFire Tactical Trinity is simple at its core, but life on the streets can get complicated. That's why this guide expands on the core law enforcement tools outlined earlier. Are you tactical? Then you'll need sound suppression for close-quarter combat. SureFire sound suppressors help protect your hearing, and the hearing of your colleagues, without impeding weapon accuracy or adding much weight to your long gun. Or how about having searing white light onboard your shotgun via a dedicated forend? Edged weapons, Sonic Defenders® or a SureFire Pen that does more than write are just a few tools that'll give you the edge you need out on the streets. The SureFire Tactical Trinity is the starting point, a core set of principles, but at SureFire we can meet many of your tactical needs head on.

RIFLE, CARBINE & SUBMACHINE GUN WEAPONLIGHTS

A WEAPONLIGHT ON EVERY WEAPON YOU USE IS A VITAL ASPECT OF THE TACTICAL TRINITY SYSTEM. SUREFIRE MAKES A VARIETY OF COMBAT-TESTED WEAPON-MOUNTED LIGHTS THAT ATTACH TO YOUR RIFLE, CARBINE, OR SUBMACHINE GUN.

SHOTGUN FOREND WEAPONLIGHTS

SureFire builds dedicated shotgun forend WeaponLights for many popular shotguns. These powerful, ergonomic lights replace the firearm's original forend and most are available with recoil-proof LED heads or shock-isolated incandescent lamp assemblies that provide enough infrared radiation to be used, in conjunction with an IR filter, for stealth operations involving night-vision devices. All models feature tactical momentary-on and constant-on switching that can be disabled to prevent accidental activation during covert operations or transport.

DEDICATED FOREND WEAPONLIGHTS FOR THE M4 / M16 / AR-15 / MP5

When you don't have a Picatinny rail forend but need powerful, reliable weapon-mounted illumination, a SureFire Dedicated Forend WeaponLight is ideal. These battle-tested WeaponLights are dedicated to specific firearm models and replace the original factory forend. They feature brilliant light output and rugged construction, along with integrated ergonomic switching vital for tactical operations.

SCOUT LIGHT® WEAPONLIGHT

The Scout Light is compact and lightweight but puts out a powerful white beam that makes it well-suited for close-quarter and longer-range operations where weight must be kept to a minimum. It attaches to a Picatinny rail in seconds, and its electronically regulated LED kicks out 120 lumens of blinding, tactical-level white light. Scout Light kits with infrared capability are also available.

VERTICAL FOREGRIP WEAPONLIGHTS (SWAT)

For superb ergonomics and increased weapon control, nothing beats a SureFire Vertical Foregrip WeaponLight. These battle-ready weapon-mounted lights securely attach to your weapon's Picatinny rail by way of an integral throw-lever mount or a dual-thumbscrew clamp. The shock-isolated incandescent lamps produce a brilliant white light and are suitable for covert operations using night vision devices when lights are fitted with optional infrared filters. SureFire Vertical Foregrips also feature low-output LED navigation lights in night-vision-friendly colors.

order at: www.surefire.com/weaponlights

SUREFIRE HELMET LIGHT

The SureFire Helmet Light provides low-profile, hands-free illumination designed for navigation, loading gear, equipment repair, and most close-quarter tactical illumination needs. Available in multiple night-vision-friendly colors, including infrared (IR) output for use with night vision devices.

order at: www.surefire.com/helmetlight

EXPORT OF THESE PRODUCTS REQUIRES A VALID EXPORT LICENSE ISSUED BY THE U.S. DEPARTMENT OF STATE.

INFRARED (IR) LIGHTS

Infrared illumination, invisible to the naked eye, is a powerful covert tactical tool when combined with night vision devices. SureFire makes a dedicated infrared handheld light (M1 Illuminator), a handheld with secondary infrared LEDs (Kroma® Mil-Spec), Helmet Lights featuring IR LEDs, and WeaponLights with infrared output when using IR filters to block out visible light.

The new SureFire V-series lights, which include new WeaponLights and the new V2 Vampire™ flashlight, will provide operators with white light and infrared output from one sealed unit. Both outputs are accessible with the turn of a self-locking selector ring, with no IR filters needed. SureFire still makes IR filters for nearly every incandescent and HID we build, so you can select the option that's right for you.

Visit www.surefire.com and search using keyword "IR" for complete list

V2 Vampire™ shown

EXPORT OF THESE PRODUCTS REQUIRES A VALID EXPORT LICENSE ISSUED BY THE U.S. DEPARTMENT OF STATE.

SONIC DEFENDERS®

EP3 Sonic Defenders and EP4 Sonic Defenders *Plus* earpieces feature low-profile ergonomic design and soft-polymer construction that provide comfortable protection from loud harmful sounds while allowing normal conversation to pass through. Their natural shape conforms to your ear, locking them into place and allowing you to wear them with a helmet, mask, or while using a phone.

order at: www.surefire.com/earpro

EDGED WEAPONS

HANDCRAFTED SUREFIRE EDGED WEAPONS ARE COLLECTOR QUALITY, BUT THEY WERE MADE TO BE USED. DESIGNED AND BUILT BY HAND TO MEET THE DEMANDING NEEDS OF LAW ENFORCEMENT AND THE MILITARY, THESE KNIVES THRIVE UNDER THE HARSHTEST CONDITIONS. OUR KNIVES ARE DESIGNED WITH INPUT FROM END-USERS, THEN BUILT BY OUR EXPERT TEAM. EVERY DESIGN ELEMENT ADDS TO OUR EDGED WEAPON'S OVERALL FUNCTION, PRODUCING A KNIFE THAT IS RELIABLE, DURABLE, AND LOOKS AS GOOD AS IT FEELS. A SUREFIRE EDGED WEAPON BELONGS WITH THE HARDCORE PROFESSIONAL WHO APPRECIATES THE IMPORTANCE OF A RUGGED, FUNCTIONAL PIECE OF TACTICAL STEEL THAT'S WORTHY OF THE SUREFIRE NAME.

L.E.O.[®] FOLDER

The L.E.O. was designed with the needs of law enforcement in mind. The L.E.O.'s blade, made from CPM[®] S30V[®] steel, renowned for its strength and edge-holding ability, has a deep drop-point for maximum safety and control when cutting away seatbelts, clothing, or harnesses. Yet it's still pointed enough to provide excellent penetration. It includes a Flex-Cuf[®] cutter, integral blade finger guard (also serves as flip-open lever), flathead screwdriver, and a reversible titanium pocket clip. SureFire also makes Delta blades, both folder and fixed, and the Echo fixed blade features scalloped serrations for heavy-duty cutting.

order at: www.surefire.com/leo

THE SUREFIRE[™] PEN

This recent addition to the ever-growing SureFire family has a lot to prove—and it delivers. It boasts a virtually indestructible aerospace aluminum body that's hard anodized for extreme durability. It's appointed with a tumble-polished stainless steel tip, pocket clip, and a window-breaker tailcap that's always ready for emergencies. This retractable pen comes standard with a high-quality Schmidt[®] Technology easyFLOW 9000 ink cartridge. Smooth writing, bold design, and—oh yeah—it breaks windows or anything else that might get in your way.

order at: www.surefire.com/pen

WINDOW BREAKER

FAST-ATTACH® SOUND SUPPRESSORS

SUREFIRE FAST-ATTACH® SOUND SUPPRESSORS UTILIZE CUTTING-EDGE DESIGN, ADVANCED METALLURGY, AND PRECISION MANUFACTURING TO CREATE THE WORLD'S FINEST SUPPRESSORS—PERIOD. CONSISTENT, MINIMAL SHIFT FROM A WEAPON'S UNSUPPRESSED POINT OF IMPACT, COMBINED WITH SUPERB SOUND ATTENUATION AND SUPERIOR FLASH AND DUST SUPPRESSION, SET SUREFIRE SUPPRESSORS APART. OPERATORS USING SUREFIRE SUPPRESSORS BENEFIT FROM THEIR HIGH-PERFORMANCE SOUND ATTENUATION THAT HELPS PROTECT THE HEARING OF YOU AND YOUR FELLOW OFFICERS, WHILE ALSO ENHANCING COMMUNICATIONS AND DISGUIISING YOUR POSITION IN BATTLE. THE FAST-ATTACH SYSTEM PERMITS REMOVAL OR RE-ATTACHMENT OF THE SUPPRESSOR IN SECONDS, WITH NO TOOLS REQUIRED AND NO NEED TO RE-ZERO IN MOST CASES, BY UTILIZING SUREFIRE ADAPTERS AS ROCK-SOLID MOUNTING PLATFORMS. ENGINEERED TO PERFORM, BUILT TO LAST, AND PROVEN IN COMBAT. SUREFIRE MAKES THE WORLD'S FINEST SOUND SUPPRESSORS.

800.828.8809 → www.surefire.com

ALL OF THESE FEATURES + COMBAT PROVEN

- Compact & Lightweight
- High-Performance Sound Attenuation
- Significant Reduction of Flash & Dust Signature
- Zero or Minimal, Consistent Point-of-Impact Shift
- Typically Improves a Weapon's Accuracy
- Extreme Durability
- Fast Attachment/Detachment
- No Permanent Weapon Modifications
- Adapters Offer Stand-Alone Functionality

SUPPRESSOR ADAPTERS

SUREFIRE SUPPRESSOR ADAPTERS SERVE TWO PURPOSES:

- 1 They act as rock-steady mounting platforms for SureFire suppressors.
 - 2 They are stand-alone devices that enhance the performance of your firearm.
- Our proprietary adapter design ensures precise alignment of a SureFire suppressor every time, and multiple bearing surfaces offer solid, steady support for the suppressor.

EVEN RELIABILITY = FULL-TIME USABILITY

There are three types of SureFire adapters. Each offers different performance characteristics as a stand-alone device.

Muzzle Brakes

Reduce recoil and muzzle rise, allowing a shooter to re-acquire a target more quickly.

Flash Hiders

Reduce a weapon's flash signature, therefore masking one's position; they also preserve a shooter's night-adapted vision.

Compensators

Provide the best of both worlds by greatly reducing flash and muzzle rise.

SEE THE VIDEO AND ORDER AT:
WWW.SUREFIRESUPPRESSORS.COM

EXPORT OF THESE PRODUCTS REQUIRES A VALID EXPORT LICENSE ISSUED BY THE U.S. DEPARTMENT OF STATE.

The exact SureFire adapters available for your firearm depend on your weapon's caliber, make, and model. For a complete listing, visit www.surefiresuppressors.com

ACCESSORIES

A COMPLETE LINE OF ACCESSORIES HAVE BEEN DESIGNED TO OPTIMIZE YOUR SUREFIRE ILLUMINATION TOOLS. THIS IS ESPECIALLY VITAL WHEN MEETING THE NEEDS OF THOSE WHO GO IN HARM'S WAY. MAKE YOUR SUREFIRE LIGHT EVERYTHING IT CAN BE; CHOOSE GENUINE SUREFIRE ACCESSORIES.

TAILCAP SWITCHES

Customize your SureFire illumination tool with a press-for-momentary-on/twist-for-constant-on tactical tailcap switch, or a press-for-momentary-on/press-further-to-click-constant-on tailcap switch. Operate your SureFire in the manner that's right for you.

FILTERS, DIFFUSERS & COVERS

SureFire filters convert white light into night-vision-friendly colors, diffusers widen beam patterns, and covers protect your light. The flip-up feature transitions your light quickly and easily. Holsters, traffic wands, Combat Rings™ lanyards, pistol leashes, and trustworthy lithium batteries are just some of the SureFire accessories that'll ensure that you and your SureFire are operating at peak performance.

SPARES CARRIERS

SureFire spares carriers hold a spare lamp assembly and four or six spare SF lithium 123A batteries. They're made of an impact-resistant polymer and O-ring sealed to make them watertight. Attaches to a durable nylon lanyard with dual cord-locks.

order at: www.surefire.com/accessories

SUREFIRE ShotTimer FOR THE APPLE iPhone

The SureFire ShotTimer is an effective and convenient way for shooting enthusiasts, law enforcement officers, and military personnel to improve their shooting skills and monitor their progress. The SureFire ShotTimer displays the elapsed time and the split time for every shot fired, and allows you to email results for later analysis. Using the start-delay option, you can easily train alone or enable the Par Time mode and try to beat the clock. And the ShotTimer can be adjusted to recognize the unique acoustics of your weapon, even when at the range.

download at: www.apple.com/itunes/download keyword: **shottimer**

Visit www.surefire.com to learn more about any SureFire product.

DURABLE LED CONVERSION HEADS

SureFire offers LED assemblies and conversion heads that simply drop in or screw onto most SureFire incandescent lights, so you can easily upgrade many of your trusted SureFire lights with the latest LED technology. High-performance LEDs offer substantial advantages* over incandescent bulbs, including:

- Higher lumen output
- Longer runtime
- Virtual immunity from failure due to shock, vibration, or recoil
- Longer service life with no filament to burn out or break

order at: www.surefire.com/ledheads

* Despite their many advantages, most white-light LEDs put out minimal infrared radiation, so they're not suitable for IR uses, excluding the aforementioned new SureFire V-series LEDs, which emit both white light and infrared output from one sealed unit. SureFire incandescent lights, when used with appropriate IR filters and night vision devices, are suited for operations requiring infrared output.

SUREFIRE BATTERIES

SureFire 123A lithium batteries are smaller in size yet have a higher power density and voltage than alkaline batteries. They also have a 10-year shelf life, are lighter in weight, offer better cold-weather performance, and are engineered with built-in fault and heat protection for added safety.

WARNING:

Lithium batteries can explode or cause burns if disassembled, shorted, recharged, exposed to water, fire, or high temperatures. Do not place loose batteries in a pocket, purse, or other container containing metal objects. Do not mix with used or other battery types, or store with hazardous or combustible materials, or incinerate. Do not puncture batteries. Store in a cool, dry, ventilated area. Follow applicable laws and regulations for transport and disposal.

INFERIOR IMPORTED BATTERY and COUNTERFEIT BATTERY WARNING:

There have been numerous reported incidences of counterfeit and/or low-quality batteries spontaneously combusting or venting, which have resulted in damage to the flashlight and in some cases property damage or personal injury. For this reason SureFire strongly recommends that you use only SureFire-brand lithium batteries (or batteries manufactured by well-known manufacturers such as Panasonic®, Energizer®, or Duracell®) to guarantee safe performance. SureFire's lithium batteries are manufactured to strict quality-control standards specifically for use in high-performance, high-drain

devices, and contain built-in fault/heat protection. The use of lesser-known or counterfeit brands could damage your SureFire product and may constitute a safety hazard. To ensure that you get authentic, competitively priced SureFire batteries, purchase them only from www.surefire.com or from an authorized SureFire reseller. Use of non-SureFire-brand batteries may void your warranty. Customers are specifically cautioned not to purchase batteries from online auction websites, as these are known sources of counterfeit batteries. Review complete SureFire battery information at www.surefire.com/batteries.

Panasonic®, Energizer®, and Duracell® are registered trademarks of these respective companies. SureFire's mention of these companies does not constitute their endorsement of SureFire, LLC.

THE SUREFIRE NO-HASSLE GUARANTEE

Lamps will burn out, batteries will be used up, and switches may eventually wear out. Everything else is covered by our no-hassle guarantees:

ILLUMINATION TOOLS WARRANTY

SureFire warrants our illumination tool products to be free from defect in workmanship and materials, including any LEDs housed within, for the lifetime of the original owner. We will repair, replace, or refund your original purchase price of this product, at our discretion, if it is determined by us to be defective. Electronics, chargers, and rechargeable batteries are covered for a period of two years with proof of purchase. Normal wear and tear—including lamps burning out, batteries draining, and switches wearing out—is not covered, nor is damage resulting from abuse, neglect, battery leakage, use of other than SureFire-brand batteries or accessories, or altering this product from its original state. SureFire offers a 10-year limited warranty in any country or under any jurisdiction where specific restrictions exist on limited lifetime warranties.

SUPPRESSOR WARRANTY

SureFire, LLC will repair or replace free of charge any suppressor manufactured by SureFire, LLC for the duration of this lifetime warranty. This warranty is of unlimited duration and covers service, repair, and/or replacement of suppressors damaged during normal use and conditions. This warranty guarantees our suppressors to be free from defect in workmanship and materials. This warranty does not cover damage to the suppressor resulting in whole or in part from criminal or negligent use, improper or careless handling, unauthorized modifications, defective, improperly loaded, non-standard, non-SAAMI/NATO specification ammunition, or neglect. Any repairs to the suppressor made necessary by these factors will be invoiced to the owner. SureFire assumes no responsibility whatsoever, and will honor no claims for damages, regardless of nature, for physical injury or property damage resulting from careless and/or irresponsible handling, adjustments to the suppressor, neglect or abuse.

This expressed lifetime warranty is the only warranty on this suppressor. This has no implied warranties of merchantability or fitness for a particular purpose. There are no warranties which extend beyond the description set forth herein.

WARRANTY CLAIMS

For repair or replacement contact Customer Service at 800-828-8809 (toll free) or 714-545-9444 and obtain a Return Merchandise Authorization number (RMA#). Then package the unit carefully and return (no CODs please) to:

SureFire, LLC
Repairs Department, RMA# _____
17680 Newhope Street, Suite B
Fountain Valley, CA 92708

SureFire will pay any reasonable shipping costs to return the unit to you.

SureFire, LLC reserves the right to correct any errors or inaccuracies contained herein, and to revoke stated offers at any time without notice. Prices, availability, specifications, and promotional offers are subject to change or cancellation at any time without notice. Weights, measures, and shipping information are approximate, and product images may appear without perfect accuracy. SureFire, LLC disclaims all warranties, whether express or implied, with respect to the accuracy or completeness of any information contained herein, to the fullest extent possible under applicable laws. Under no circumstances shall SureFire, LLC be liable for any direct, indirect, incidental, special or consequential damages that result from any information contained herein.
